EDUCATION

Singapore Institute of Technology, Singapore

September 2023 - Oct 2026

B.S.c in Computing Science

Temasek Polytechnic, Singapore

April 2018 - April 2020

Diploma in Information Technology

EXPERIENCE

Monetary Authority of Singapore

Sept 2025 - Apr 2026

Cloud Engineering Intern

Singapore

- Built SSM automation workflows using Terraform across 50+ AWS accounts (Organizations) and servers, auditing resource compliance with automated alerting and remediation
- Automated patch compliance checks and S3 log collection using Ansible and Linux scripting

Roycemedia Technologies Pte Ltd

July 2019 - March 2020

Part Time Software Developer

Singapore

- Refactored monolithic ASP.NET codebase into modular MVVM components across the system, improving long-term maintainability
- Built and deployed full-stack features (ASP.NET/C#), including Nginx deployment on Linux servers

TECHNICAL STRENGTHS

Programming: Python, Kotlin, C#, Java, JavaScript

Databases: SQL, Firebase, MongoDB

Tools/Platforms: AWS, Kubernetes, Git, Linux, Docker, Ansible, Terraform, React

PROJECTS

Homelab

- Self-hosted a privacy-focused infrastructure stack (AdGuard Home, WireGuard, Nginx Proxy Manager) and service alternatives (Nextcloud, Forgejo, SearXNG) to reduce third-party dependency, all on Docker
- Designed an idempotent Ansible pipeline for one-command redeployment; operate 10+ service stacks across 20+ containers, continuously maintained

Earthquake Aftershock Prediction System

- Deployed a 4-node Kubernetes cluster on AWS simulating a seismic sensor network, streaming sample data via Kafka to a central node running an aftershock ML prediction model
- Integrated a Flask/Docker pipeline to ingest model output and visualize predicted affected areas on a web-based map interface

Diagram-to-IaC

- React tool converting drag-and-drop cloud diagrams into deployable Terraform HCL
- Supports core AWS resources (e.g. EC2, IAM, S3, VPC) with node-level customization (instance type, storage size, region) and nested security group membership
